

Client DVP Case Study

Streamline the audit and reconciliation process

COMPANY STUDIED

MARIC HEALTHCARE

I absolutely love the Data Validation Platform! I think it is a huge benefit for our large company to have this audit resource in place as an extra reconciliation process.

Joanne Fuller
Maric Healthcare, LLC

CHALLENGE

Maric Healthcare typically conducts audits between their HRIS and carrier benefit site, reviewing at least 1400 lines of Excel data per audit.

SOLUTION

Maric Healthcare leveraged carrier technology credits to implement the DVP. Utilizing the DVP optimized their audit process to ensure accuracy and efficiency.

RESULTS

Reduced **Maric Healthcare's** audit time from 5-7 days to a couple of hours. This allowed Maric to quickly identify 12% of data that was out of sync; to include demographic coverage and deduction discrepancies.

BENEFITS

- Significantly reduced audit time from several days to a few hours, enabling HR to focus on more strategic company tasks.
- The DVP is able to handle large volumes of data, making it suitable for a growing healthcare organization such as **Maric Healthcare**.
- Leveraged tech credits to cover the first year of cost for a DVP subscription
